

DEPLOYING EXCELLENCE:

TRANSFORMATIVE IT SOLUTIONS FOR DEFENSE

ABOUT US

C2 Defense specializes in delivering cutting-edge IT solutions tailored for the complexities of modern defense operations. Our expertise lies in crafting transformative technologies that enhance strategic capabilities, ensuring seamless deployment, and empowering the U.S. Army with unparalleled excellence.

WHY C2 DEFENSE?

C2 Defense's leadership has over 70 years of proven experience working with and within the DoD to ensure successful joint, all-domain operations. From their years of deployments in combat zones and their experiences as Non-Commissioned Officers, Warrant Officers, and Commissioned Officers, they have a deep understanding of the military's needs. This perspective allows C2 Defense to develop technology solutions that are technically advanced, practical, and aligned with real-world operational challenges.

C2 Defense is committed to leveraging our military expertise to deliver innovative solutions that enhance mission readiness and operational efficiency.

THE C2 DEFENSE MISSION

Our Mission is to deliver the highest quality service and products that support our Nation's Soldiers in the field and enable the success of our customers' missions.

Who We Serve

C2 Defense is dedicated to supporting and partnering with the DoD to achieve their operational goals by offering technology solutions that aid in their mission to safeguard National security.

SERVICES

Integration Services

We provide comprehensive hardware and software integration services for tactical and enterprise networks for seamless connectivity, optimal performance, and operational excellence.

Network Security & Design Services

We build resilient network architectures and implement cutting-edge security measures against a growing threat landscape with encompassing security strategies, conducting vulnerability assessments, and designing scalable network infrastructures.

Network Automation

We deliver innovative and efficient solutions for network infrastructure. We focus on enhancing security, scalability, streamlining operations, error reduction, and optimizing resource allocation.

Advanced Testing

We conduct comprehensive MIL-STD (military standard) testing at our integration facility. Through rigorous testing protocols and meticulous evaluation, our integrated approach ensures that network solutions meet and exceed the requirements, providing assurance that the systems are mission-ready and prepared for any operational environment before they leave our facility.

Value Added Reselling

Unlike traditional resellers, we offer a value-added approach by not just supplying products but also providing expert integration, support, and training services tailored to the needs of the defense sector.

CONTRACT VEHICLES

C2 Defense boasts a comprehensive partner network, enabling us to engage in business activities through a diverse range of government contracts to include:

SOLUTIONS

The U.S. Army, PEO C3N's Commercial Coalition Enclave (CCE)

C2 Defense proudly supports the CCE program provided by the Program Executive Office for Command, Control, and Communications-Network (PEO C3N), with our advanced baseband solution. CCE is a critical capability that enhances interoperability and information-sharing among coalition partners, government agencies, and commercial entities. The CCE streamlines access to shared resources, enhances situational awareness, and promotes real-time information sharing, facilitating international and cross-sector cooperation while maintaining stringent security protocols.

The U.S. Army, PEO C3N's Scalable Network Node (SNN)

C2 Defense proudly supports the PEO C3N's Scalable Network Node (Scalable N/N) with our advanced baseband solution. This versatile system serves as a foundational building block, enabling the rapid deployment of voice, data, and video communication capabilities in the field.

The Scalable N/N supports a wide range of missions, from forward-deployed operations to command post configurations, and offers scalability to accommodate varying network requirements.

The U.S. Army, PEO C3N's Sustainment Transport System (STS)

C2 Defense proudly supports the PEO C3N's Sustainment Transport System (STS) with our advanced baseband solution.

STS is a vital component of the Army's modernization efforts. These systems will improve the exchange of data in network security, capacity, resiliency, range, and mobility providing Soldiers with critical sustainment tools, aiding in the timely delivery of supplies, personnel, medical care, and force protection in operational environments.

C2 TC+

C2 TC+ is designed to optimize Size, Weight, and Power (SWaP) factors, offering portability without compromising durability and functionality. It ensures that essential equipment and critical communication tools can be carried efficiently by personnel, enhancing their mobility and agility on the battlefield.

Minimizing SWaP empowers military and defense personnel to focus on their missions because they know they have a reliable and compact solution ready to support their operational needs.
